

easy etch

**Please read all instructions first.
Please ensure you use appropriate protective
equipment for your own safety.**

- Re-Usable Cream
- Gives "fingerprint proof" finish
- Etches large and small areas evenly
- Surface for paints, rubber stamps and inks

easy etch instructions

Etches designs on glass, mirror, ceramic glazes, porcelain, marble

1. Clean glass or mirror surface. Dry with lint free paper towel or cloth.
2. With a computerised system system, eg Craft Robo kit, cut your design onto the stencil sheets. Remove the detail of the design with a burnishing tool. Apply the application tape to the design and peel back. This will then remove the design from the stencil backing paper. Then apply graphic on the application tape to your project. Press down firmly and then gently peel back application tape.

With a non computerised stencil cover the entire surface with stencil sheets. Trace and cut your design with a craft straight or swivel knife.

3. Use an Easy Etch squeegee to rub down the cut stencil edges and to remove any air bubbles.
4. Stir before use, then apply a heavy coat of Easy Etch cream to unexposed area. Using squeegee, pull cream over area to be etched. Never use a brush.
5. Leave cream on design for 15 minutes.
6. Using squeegee, return majority of cream to Easy Etch container to be reused.
7. Flush etched surface with water to remove remaining cream.
8. Remove stencil under water to avoid cream getting on non-etched surface.

CERAMICS, PORCELAIN AND MARBLE:

Use instructions above for removing glazed surface to create a matte design.

SANDBLASTED AREAS:

After sandblasting and while stencil or resist is still in place, follow steps 4,5,6,7 and 8. The Easy Etch cream will etch and "fingerprint proof" the sandblasted area.

WARNING:

Harmful if swallowed. May cause burns which may not be immediately painful or visible. Keep out of reach of children

PRECAUTIONS AND FIRST AID:

Avoid skin contact. Wear protective gloves and clothing.

For skin contact, wash thoroughly with soap and water for about 5 minutes.

Avoid eye contact.

Wear safety glasses with side shields or goggles

For eye contact, flush thoroughly with water for 15 minutes.

May be harmful to breathe mist or dust.

Use in area with adequate ventilation.

Avoid ingestion. If swallowed, drink large quantities of water followed by milk. Do not induce vomiting.

Get prompt medical attention.

For further health information, contact your local poison control centre.

INGREDIENTS: Active ingredient 20% Ammonium Bifluoride. Inert ingredients 80%
